CAREER OBJECTIVE

Motivated 3rd-year B.E. Computer Science and Engineering student with hands-on experience in full-stack web application development, enterprise software systems, and AI/ML model integration. Seeking an internship or entry-level software engineering role to contribute technical expertise in Java, Spring Boot, React, and database systems while building scalable real-world solutions.

RESUME AS GAMING PORTFOLIO WEBSITE

DEMO: https://amaravathia.netlify.app/

EDUCATION

Degree / Course	Institution	Board / University	CGPA / %	Year
B.E. Computer Science & Engineering	Velammal College of Engineering and Technology, Madurai	Anna University	8.75 CGPA (until 4th sem)	2024 – 2028 (Now 3rd Yr)
Higher Secondary (HSC)	Government Higher Secondary School, Muthuramalingapuram.	State Board	88%	2021
Secondary (SSLC)	Government Higher Secondary School, Muthuramalingapuram.	State Board	90.5%	2019

TECHNICAL SKILLS

Programming: Java, Python, C, JavaScript, PHP

Web Technologies: React, HTML5, CSS3, Bootstrap, jQuery, Thymeleaf, Spring Boot

Databases & Tools: MySQL, Git, GitHub, Streamlit, Canva,MongoDB,VS code,Intelligi

Other Skills: Machine learning,Deep Learning,Generative AI,Problem solving

Core Expertise: Full-Stack Web Development, AI/ML Model Integration

EXPERIENCE & INTERNSHIPS

Web Developer Intern — Bitberry Technology

Oct 2025-Dec 2025 | Work: Restaurant Website — Full-Stack Web Application

Tech Stack: HTML, CSS, JavaScript, Bootstrap, MySQL

- Developed a responsive restaurant web application with modern UI, interactive components, and mobile-friendly layouts using HTML, CSS, JavaScript, and Bootstrap.
- Implemented database connectivity to store and manage dynamic restaurant data, gaining hands-on experience in frontend development and backend–database integration

Live Demo: https://nawaabrestaurant.infinityfreeapp.com/index.html?i=3

Software Developer Intern — Bitberry Technology

Jan 2026-Feb2026 | Work: Hospital Health Monitoring System — Full-Stack Web Application

Tech Stack: Java, Spring Boot, HTML, CSS, JavaScript, Bootstrap, MySQL

- Developed a full-stack hospital health monitoring application to manage patient registration, medical information, and patient records through a responsive web interface.
- Implemented Spring Boot backend services with MySQL database integration, including patient data storage, retrieval, updating, and deletion, gaining hands-on experience in full-stack development and backend–database integration.

AI/ML Intern — Elysium Technologies Pvt. Ltd.

May 2026 – June 2026 |Work: Develop a Model

- Developed Machine Learning prediction models, including house price forecasting and NLP-based sentiment analysis.
- Built interactive web interfaces using Python Streamlit for deploying and testing machine learning models.

KEY PROJECTS

Direct Token Multimodal Fusion For Robust Multi-Label Land-Cover Classification Under Missing And Degraded Sentinel-1/Sentinel-2 Modalities

(Aug 2026 – Sept 2026)

Tech Stack: Python, PyTorch, BEN-GE-8K, Sentinel-1, Sentinel-2, DEM, WorldCover, ERA5, Streamlit

• Developed a Direct Token Multimodal Fusion model for 43-label land-cover classification using multimodal remote-sensing data.
• Evaluated model robustness under missing and degraded Sentinel-1/Sentinel-2 conditions and developed a Streamlit dashboard for visualization and inference.

AI Multi-Agent Personalized Healthcare Digital Twin — CareTwin Chennai

(sep-2026)

Tech Stack: Python, Streamlit, Scikit-learn, NLP, Multi-Agent AI, Digital Twin, Pandas

• Developed an AI-powered healthcare navigation prototype using a personalized Digital Twin and multiple specialized agents for hospital, laboratory, pharmacy, expense, and emergency assistance.

• Implemented personalized recommendations based on healthcare requirements, location, affordability, and changing care needs, with multilingual support and interactive Streamlit dashboards.

CERTIFICATIONS & ACHIEVEMENTS

- **Java Full-Stack Web Development Certification:** Completed professional technical training program.
- **Problem solving through programming in C-NPTEL**
- **Introduction to Programming Using Java**
- **Generative AI-Introducton and Its Applications- IBM Certified**
- **Introduction to Network Automation-CISCO**
- **AI/ML Certifications (Total-7)-SPRINGBOOT INFOSYS**
- Active participant in collegiate coding competitions, hackathons, and technical paper presentations.
